

Assignment #01

Q.1: What is Entrepreneurship? Define the Process in Detail.

Entrepreneurship is the act of creating a business or businesses while building and scaling it to generate a profit. However, it is more than just business; it is a mindset of seeking opportunities, taking risks, and innovating to solve problems.

The Process of Entrepreneurship:

1. **Discovery (Opportunity Recognition):** The entrepreneur identifies a gap in the market or a problem that needs a solution.
2. **Concept Development:** Researching the idea and creating a business plan that outlines the product, target audience, and financial goals.
3. **Resource Gathering:** Identifying and acquiring the necessary resources, such as funding, human talent (team), and technology.
4. **Implementation (Launch):** Starting the actual business operations and introducing the product or service to the market.
5. **Harvesting (Growth & Beyond):** Managing the business to ensure long-term success, scaling up, or eventually exiting (selling the business).

Q.2: Difference between Entrepreneur vs. Intrapreneur

<i>Feature</i>	Entrepreneur	Intrapreneur
Definition	An individual who starts their own business.	An employee who acts like an entrepreneur within an existing company.
Risk	Bears the full financial risk of the venture.	Does not bear personal financial risk; the company takes the risk.
Capital	Raises their own capital (savings, loans, investors).	Uses the company's existing resources and budget.
Reward	Keeps the profits and owns the equity.	Receives a salary, bonuses, or career promotion.
Independence	Fully independent; is their own boss.	Operates within the hierarchy and rules of the organization.
